Learn Basic CSS

- Styling the Web pages

What is CSS?

- • CSS = Cascading Style Sheets
- • Controls how HTML elements look

Types of CSS

- • Inline CSS: Inside HTML tag
- • Internal CSS: Inside <style> tag in head
- • External CSS: Separate .css file linked in HTML

CSS Syntax

- • Structure: selector { property: value; }
- • Example: p { color: blue; }
- • Use semicolons to separate properties

Selectors

- • Element Selector: h1 {}
- • Class Selector: .title {}
- • ID Selector: #main {}

Text Styling

- • color
- • font-size
- • font-family
- • text-align
- • font-weight

Colors, Backgrounds & Borders

- • Colors: Named, HEX, RGB, HSL
- • Backgrounds: background-color, background-image
- • Borders: border, border-radius

Display & Position

- • Display: block, inline, none
- • Position: static, relative, absolute, fixed

Flexbox Basics

- • display: flex
- • justify-content
- • align-items
- • Align elements in rows or columns

Units & Responsive Design

- • Units: px, %, em, rem, vh, vw
- • Media Queries: @media for screen size changes

Tools & Resources

- • MDN Web Docs: developer.mozilla.org
- • W3Schools
- • CodePen / JSFiddle for practice
